INTERESTS

Reading Books | Participating in Social activities | Problem Solving

PROJECTS

Attendance Register App

The **Attendance Register App** is a digital tool that simplifies tracking attendance in schools, workplaces, or events. It allows quick check-ins, real-time monitoring, and generates detailed attendance reports. With secure access and customizable features, it streamlines the attendance process, improving accuracy and efficiency.

Expense Tracker Web App

The **Expense Tracker App** helps users manage and monitor their spending by recording daily expenses and categorizing them. It provides visual insights through charts and reports, helping users track their financial habits. With budget-setting features and real-time updates, it promotes smarter financial management.

Ecommerce application

An e-commerce application involves user authentication, product catalog display, search and filtering like tree concept, and a shopping cart for managing orders. It includes a checkout process integrated with payment gateways, order tracking, and inventory management. Admin dashboards allow for managing products, orders, users, and site content

Weather Prediction App

This project is a weather website that provides live weather updates and forecasts based on your location. Stay informed about current weather conditions, temperature, and more. Explore interactive maps, hourly/daily forecasts, and helpful insights. Stay ahead of the forecast and make the most of your day!
